REGION STATISTICS

Testimonials

"I have to admit I'm not a podcast person, but I truly enjoy this podcast due to the wide range of topics and guest speakers. A lot of people would shy away from some of the topics that the host tackles and I think these are the discussions we need to have to make the field better and continue to do better for the families and individuals we serve. I look forward to hearing more amazing guests come on and give their input. Also thank you for not shying away from the issues the BIPOC community faces and tackling these difficult discussions head on!" - Podcast Listener

"... values based supervision and mentorship with Hilary McClinton. I had just started as an independent IT and it made me realize my values and my lack of satisfaction with my previous supervisors. It helped me prepare for the role I currently hold and it made me more aware of my values." - Podcast Listener
